T O T H O R A
TIME SCULPTURES

Dreams that come true and become sculptures, count the time in silence, second to second, clocks transformed into canvases and works, which cover the most impressive spaces of your home.

Handmade with noble woods, a tribute to the cabinet-makers, who with their hands really do an exceptional job, someone will say that it is art, we call it passion.

Yes, we are moved by passion, we work as a team and together we see what is born of the imagination and that we want you to like.

All the woods used are 100% natural, from countries with controlled logging from reforested forests, thus ensuring sustainability policy of our environment.

Tothora, time elevated to art.
